Professional Experience

Full Stack Developer, *Tatbiq Company*
05/2021 – 02/2022 | Doha, Qatar
- Responsible for developing and maintaining a mobile taxi application by using React Native, React JS, Firebase, NodeJS, Express JS, Socket IO, Amazon Web Services, and Google Cloud Platform
- Reduced the monthly cost of GCP services by $700 by developing a function that detects the nearest drivers and ETA's more efficiently
- Designed and developed a favorites feature which streamlined the end-to-end customer journey by enabling customer to book a ride in 5 clicks
- Managed and mentored a team of 5 developers by providing direction, guidance, and training in all aspects of the service lifecycle
- Investigate and troubleshoot real time customer bugs to address the root cause of customer interface issues within the agreed SLA

Information Technology Intern, *QDVC*
06/2019 – 08/2019 | Doha, Qatar
- Created an intranet using Microsoft ASP.NET to assist employees in processing company requests and streamlining the approval flow which reduced the lead time from an average of two (2) days to 30 minutes
- Managed the biometrics database system which contained more than 500 employees and third-party personnel
- Led the cloning of computers that were to be given to repatriated employees

Projects

GetCab, *Ride-Hailing App*
A mobile application that caters to taxi companies that enabled customers to order rides and automatically dispatched taxi drivers to their locations, including real-time tracking

QuickbooQ, *E-Commerce App*
A mobile application that provides a platform for companies to market their assets and allow their customers to reserve these assets through the application
